education

Hogeschool Universiteit Brussel (HUB)

2007 ~ 2009

Post-Graduate Degree in "IT Management"

Project Management Information Management & Strategy
Software Engineering, Change Management, Auditing & Security

Katholieke Hogeschool der Kempen (KHK)

1998 ~ 2001

Bachelor Degree in "Toegepaste Informatica"

British Chamber of Commerce *(co-operation with the KHK)*

2001

Certification in "Business English"

experience

Infrastructure Architect @ RealDolmen

02/2011 ~ now

Consultancy – Strategic assistance during long term decision making

Projects – Technical Lead for large infrastructure projects

Outsourcing – Dedicated architect for several long term outsourcing customers

Service Management – Delivering & guarding the correct service for all parties involved

Coaching – Acting as a mentor to all kind of engineers

Presales – Infrastructure Design & Bid Responsible

Trend Analysis – Objective insight into emerging technologies

Team Leader Infrastructure @ Vangenechten Group

07/2008 ~ 01/2011

Project Management - Manage internal high profile Infrastructure projects

Team Management – Team leader of the central Infrastructure team

Coaching – Guiding team members through the inner workings of project methodologies

System Architect – Designing & maintaining complex / distributed ESX, Ubuntu & Storage farms

Application Integration – Integrating new business application within our environment in a sustainable manner

System Integrator @ Nokia Siemens Networks

01/2007 ~ 06/2008

System Integration – Integration for several software projects designed for the mobile industry.

System Engineer - Complex high availability clustering with Unix (Solaris) / J2EE Application Server / Oracle RAC

Consultant – Represented Elmos ICT Services within Nokia Siemens Networks

System Engineer @ Vangenechten Group

08/2001 ~ 12/2006

Infrastructure System Architect – Designing the cluster setups for the in-house built J2EE ERP application

Linux System Engineer – Maintaining a complex / heterogeneous linux environment

Oracle Database Administrator – Responsible for maintaining a production & staging oracle clusters

Monitoring – Design, integration & maintenance of the central monitoring system

Central Desktop Management – Setup of the systems who manage the lifecycle of the workstation

Service Desk – Providing 1st line end-user support & 2nd line technical support

Personal Life

Team Building – Organizing several (yearly occurring) teambuilding activities for a large group of friends.

Open Source – Contributing to several Open Source communities

entrepreneur

Owner @ LogiTouch (part-time)

08/2008 ~ 09/2010

Web Based Projects – Providing commercial websites for small businesses

Managing Partner @ TuxSolutions (part-time)

02/2003 ~ 04/2008

Operations Management – Responsible for the commercial & operational aspects of a small hosting provider

technical

Load Balancing – Complex setups within the manufacturing & mobile industry using F5 LTM technology

Databases – Setting up & maintaining Oracle RAC Clusters & mysql databases

Software Packaging – Automated packaging & deployment of in-house build software.

J2EE Application Servers – Used to handling cluster setups with Oracle/BEA Weblogic, but also with Tomcat web containers.

User Management – Tight integrations with a central LDAP directory

Mixed environments – Used to working a heteronomous environment with Linux, Unix, Netware, Mac & Windows

Linux – In-depth knowledge of linux distributions (Ubuntu, RedHat, SuSe, Debian & Gentoo)

Linux – Thorough insight into Bash scripting

Virtualization – In-depth knowledge of virtualization setups using Vmware ESX

Storage – Used with working with DAS, NAS & SAN environments (Dell, Equallogic, Netapp Metrocluster, ReadyNas, OpenFiler, Nexenta Stor; HP EVA/MSA/LeftHand)

Datacenter Operator – Clean, tidy & professional handling of datacenter setups

Traffic Shaping – Experience with traffic shaping by PacketShaper

Complex Setups – Used to setups involving distributed/redundant/secure LAN/WAN setups

product xp

Content & Document Management Systems - Alfresco, Wordpress, Drupal, LiveLink, ...

Project Management – Microsoft Project, GanttProject, BaseCamp, ...

Collaboration – Outlook, Groupwise, Wiki, Blogging, Messaging Suites, ...

Productivity – Microsoft Office Suite, OpenOffice Suite, Visio, ...

projects

Trusted Advisor for outsourcing customers ;

- Vlaamse Maatschappij voor Watervoorziening Public / Utility
- Euro Pool Systems Industry / Food
- Panasonic Energy / Batteries Industry

RealDolmen

Cloud Readiness : Evaluate cloud possibilities for organizations of all sizes.

Various Customers (RealDolmen)

Roadmap Study : Determine the future IT landscape, and define the projects needed to fulfill

Various Customers (RealDolmen)

Full IT Landscape design / build-up

Various Customers (RealDolmen)

IT Audits & Optimization : Capacity, Security, Licensing, ...	Various Customers <small>(RealDolmen)</small>
Integration of a newly acquired Russian site into the Group	Vangenechten Group
Managing the infrastructure part of the Accountancy migration	Vangenechten Group
Mentor for the internship which will revise our Desktop Management policies	Vangenechten Group
Managing the upgrade from Oracle 10 to Oracle 11	Vangenechten Group
Implementation of a joint document management system between Sales & Customers	Vangenechten Group
Introducing several Standard Operating Procedures into the Infrastructure team : naming convention, network standards, service management, ...	Vangenechten Group
Centralized Storage Architecture for the Prepress Department	Vangenechten Group
Infrastructure implementation for a group reporting software (Infor PM)	Vangenechten Group
Setting up a Vmware ESX farm with central iSCSI storage (Equallogic)	Vangenechten Group
Datacenter / Server consolidation : in regards to OS licensing & capacity optimization	Vangenechten Group
Managing various LAN Optimization projects for local branch offices throughout Europe	Vangenechten Group
Initial Steps in defining internal SLA's on Infrastructure level	Vangenechten Group
Setting up various commercial websites for SMB's	LogiTouch
Deployment Integration for a mobile J2EE SIP platform on Solaris with Oracle RAC	Nokia Siemens Networks
Setup / Maintaining custom monitoring application	Nokia Siemens Networks
Coaching when setting up the internal HR website	Elmos ICT Services
Infrastructure design for the ERP migration from Mainframe to Intel hardware <ul style="list-style-type: none"> - Weblogic Clustering - BigIP Load Balancing - Oracle RAC Implementation - Various integrations : Alfresco DMS, Workflow, ESB (eMule), ... 	Vangenechten Group
Migration from Netware to Suse Open Enterprise	Vangenechten Group
Setup / Maintaining proactive Nagios Monitoring	Vangenechten Group
XP rollout on international level, with tight desktop integration & localization	Vangenechten Group
Remote branch office setup using Citrix Metaframe in a Novell Environment	Vangenechten Group
Legislation in regards to Government Procurement	EBP
People Management for Middle Management	Penta Management
Project Management Coaching	Abas Consult
Oracle 10g Performance Tuning	5 Hart
BEA WebLogic 9.x : Upgrading to WebLogic Server 9.0	WLS-A02-90
Oracle 10g Database Administration Advanced	5 Hart
MsProject 2003	Cevora
BEA WebLogic Server 8.1 : System Administration 2	WLS-A21-81
BEA WebLogic Server 8.1 : System Administration 1	WLS-A11-81
Business Objects E6 Admin	Business Objects
Novell Zenworks for Desktops 4 Advanced Technical Training	Novell Netherlands
Oracle 9i Database Administration Fundamentals I	The Campus
Citrix MetaFrame XP for Windows Administration	CTX-1221

training
